Recommendation Letter

To whom it may concern,

This letter confirms that Busem Deniz has successfully completed the Game Design course delivered through ELVTR and instructed by me.

Throughout the course, Busem demonstrated a strong understanding of core game design principles, including systems, level design, player experience, and narrative integration. She effectively applied frameworks such as Mechanics, Dynamics, and Aesthetics (MDA) and translated ideas into clear, structured design work.

As part of the course, Busem developed a portfolio-ready Game Design Document (GDD), where she excelled in communicating her game vision, core loop, systems, and narrative. Her work showed particular strength in worldbuilding and integrating story with gameplay.

Busem also engaged actively in feedback and iteration cycles, refining her work through peer discussion and playtesting. She demonstrated strong skills in documenting, presenting, and improving her designs key competencies for game development environments.

It has been a pleasure working with Busem, and I am confident she will apply these skills effectively in her future career in game design.
